

WATER MAIN FLUSHING AND CONTINUED TEMPORARY CHLORINATION

OLALLA WATER SYSTEM

Effective January 27, 2025

January 23, 2025

RDOS Public Works would like to remind Olalla residents that temporary chlorination remains in effect and that work is continuing on a plan to remove the temporary chlorination in the near future. As part of this plan, crews will be conducting flushing of the Olalla water mains during the week of January 27, 2025.

Water main flushing can result in the disruption of sediments in the water mains, resulting in discoloured water and elevated turbidity in localized areas. Crews will make all efforts to remove any discoloured water, however, if you experience dirty water, simply run your cold water taps only and/or garden hose until the water runs clear.

Minimizing the amount of hot water usage will limit the amount of sediments that could potentially settle out in your hot water tank. Residents may also wish to isolate in-home water treatment systems during this time. Residents should check the water quality before laundering clothing to minimize potential staining or discolouration.

For further information, please contact RDOS Utilities at 250-490-4135 during regular business hours, 8:30 am to 4:30 pm, Monday through Friday.

For after-hours water emergencies, please call RDOS Regional Dispatch at 250-490-4141.

Thank you for your cooperation.
