To RDOS

Attn: Shannon Duong,

Re: Variance Application C2021.48-DVP

Further to the conversations I had with your department I do not understand the need or reason to allow the minimum setback to be changed from 4.5 metres to 2.78 metres.

I realize setback rules are really just a guideline that can be varied in situations where space or an alternative location is an issue.

This does not appear to be the case here. Therefore, I fail to see why this placement is warranted.

Regards,

John Jorgensen
