Subject: IH Response: Referral Request H2023.016-TUP

You don't often get email from hbe@interiorhealth.ca. [Learn why this is important](#)

Hello,

Thank you for the opportunity to provide comments regarding this Temporary Use Permit (TUP) to allow short term rental on the subject parcel year round.

I understand this parcel is 0.15 ha (0.37 acres) in size surrounded on two sides by surface water and a neighbouring residence on a third side, and all parcels are serviced by onsite water and wastewater systems. As such, there may also be wells in relative close proximity. I understand that an Authorized Person (AP) under the Sewerage System Regulation has assessed the parcel and the proposed use, and confirmed the existing system can accommodate this proposed new use.

I have no objections to the proposed TUP given the AP's report. However, I want to share some caution. The AP's report likely focuses only on the existing/immediate shorter-term needs of the parcel (ie Can the sewerage system as designed accommodate up to 10 people at one time?). However, when considering community planning it is important to also consider the long-term sustainability of parcels serviced by onsite services. Given the quite small size of the parcel (in terms of onsite servicing) and the proximity of the river, and possibly to drinking water wells too, it would likely be difficult to find a back-up sewerage disposal area on the subject parcel in the future if/when the existing system fails. Noted on the site plan is the 30 m setback from the natural surface water boundary. All sewage dispersal fields must be kept behind this boundary. As such, a very small portion of the parcel is suitable for sewerage dispersal. In addition, vehicles approaching the parking area may be driving over this only suitable land for sewerage, which would compact the soil and further constrain the parcel for onsite sewerage (it is difficult to discern from site plan and satellite image). There is no indication on the site plan where the existing sewerage system is located. It is very important that the existing sewerage dispersal field is not driven or parked over. I recommend the owners be informed of this information, and cautioned about often having 'groups of more than 16 people staying at one time' (quoted from the rationale document). I recommend they discuss this 'extra' sewage flow with their AP.

Also, please inform them under the Health Hazards Regulation under the Public Health Act they are responsible for providing potable water to tenants. The Drinking Water Protection Act and Regulation would also apply, but may not administered for such a small water system. They could contact the [Penticton Environmental Public Health office](#) for more information. Here is the link to the [IH Drinking Water webpage](#).

Sincerely,

Anita Ely (she, her, hers)

I previously indicated that I do not have an objection to this application. I still hold that view.

My rationale is that this is a cabin community in the mountains as opposed to a residential community. Mostly the dwellings are a second "home" and perhaps only used seasonally by owners. Having more people in the community increases the safety for all.

This is a recreational community which has different needs than an urban community.

Regards,

Don Robertson

RE: Temporary Use Permit – “Vacation Rental” Use
175 Towers Road

My comments / concerns are:

- I do support the proposed use at 175 Towers Road.
- I do support the proposed use at 175 Towers Road, subject to the comments listed below.
- I do not support the proposed use at 175 Towers Road.

Written submissions received will be considered by the Regional District Board prior to a decision being made on this application.

I have read the rationale supplied by the applicants + determined that I support the use of a temporary permit based on their proposed use of vacation rental for approx 30% of the time as described. I do not support any links to VRBO or Airbnb for attracting renters to the property. I am confident ~~that~~ (and hopeful) that the owners will be vetting their clientele appropriately.

Feedback Forms must be completed and returned to the Regional District prior to noon on the day of the applicable Regional District Board meeting.
