	Powdery Mildew	*	*		*					Powder Lack	y fungal	spores												х	X	X	Prune shoot /leaf						Disinfect pruning shears	APPLES
<b> </b>	Fire Blight	*****			Leaves & shoots rapidly wilt, blacken, & die. Cankers develop & fruit/ shoots ooze bacterial slime. Disease may spread rapidly & girdle or kill the tree.																			х	X	X					X		Only cure: entire tree removal	<b>AITELS</b>

The *"Growing Fruit Trees" fact sheets & videos* for cherry, apple, peach, apricot, plum, berry, & grapes pests can be found at <u>Tree Fruit Pest Control | RDOS</u>

For more *detailed pest descriptions*, visit the <u>Home & Garden Pest Management Guide for BC Pests of Fruit Trees</u>

HAR

**CHERRIES** 

Bugs love fruit...so do bears. BC is bear country. Fruits and berries can attract bears. Keep fruit bearing plants tidy, remove and dispose of all fallen or over-ripe fruit. Visit www.wildsafebc.com
