

# Irrigation, Improvement Districts and Non-RDOS Owned Water Systems:

Numerous water systems exist within the RDOS boundary that are not owned or operated by the RDOS. Various studies have been conducted over the years by the RDOS for several of these water systems. Click on the following communities to see what studies have been completed for the local water systems.

## Apex Water System –

The Apex Circle Water System is now managed by Apex Mountain Resort. Please contact them with any questions at:

## Osoyoos(Irrigation District) –

The Water Supply report provides a summary of the findings and recommendations relative to options for developing alternative water supply sources and water treatment solutions for the Osoyoos Irrigation District (OID). The project included a review of water demands, water quality objectives, water treatment requirements, and options for supply of water to the OID service area.

## **Proposed Community Water System for Tulameen**

In 2016 a Public Information Meeting was held in Tulameen, so the Electoral Area Director could gauge the interest from property owners. The project costs were the dominant factor to the opposition by property owners that the project was abandoned.
