

Boil Water Notice

KENNEDY LAKE RESORT has been placed on a Boil Water Notice by the Interior Health Authority.

This Order applies to:

- **water delivered by the unapproved water truck,**
- **the hand pump by the lake**
- **the well and the wash house**
- **all water connections on the property.**

Until Further Notice:

All residents and visitors should use boiled water or a safe alternative such as bottled water for drinking, washing fruits and vegetable, brushing teeth or preparing beverages or ice.

Boil water for one minute then refrigerate in a clean, covered container.

This order is in place until the above noted water system has been assessed by Interior Health and results indicate a boil water notice is no longer necessary and the water is safe to drink.

For questions, please contact Interior Health at 250-770-5540
