Re: 3205 Rushbury Pl. Naramata B.C. V0H 1N0
Lot B, Plan KAP46902, D.L. 210, S.D.Y.D.

QCM has been hired by the current owners of the above listed property, to review the existing sewerage system and the possibility of relocating the sewerage system to a new location on the property. The existing sewerage system was designed by me in 2004 and installed by Gary Dickens in 2004. This sewerage system is currently servicing the existing single family home.

The owners are proposing to build a carriage house on the property, QCM has reviewed the proposal and the property and determined there is more than enough area in two separate locations to relocate a new sewerage system that can service both the single family home and the addition of a carriage house.

If you need any further information, please let us know.
