

See Sheet 2

NOTES

Produced by: British Columbia Inventory and Engineering Branch, Floodplain Mapping Program.

Survey: Field survey done by Surveys Subsection, Inventory and Engineering Branch.
 1) Horizontal control based on provincial network
 2) Vertical control based on Geodetic Survey of Canada (1978)

Mapping: Base mapping done by Map Production Division, Surveys and Mapping Branch.
 a) Contour interval - 1 metre and greater; spot elevations shown to 0.1 metres, with accuracy to 0.3 metres, except as noted.
 b) Grid origin referred to U.T.M. Projection, Zone 10 (1973)
 Final Floodplain Mapping produced by Planning Subsection, Inventory and Engineering Branch.

FLOODPLAIN DATA

a) Floodplain limits and flood profile were computed using a standard step method modelling technique.

b) Floodplain limits assume the absence of all dykes.

c) Floodplain limits and flood levels include allowances for freeboard.

d) Position of floodplain boundary not established on ground by legal survey.

e) Floodplain limits are not delineated for side streams and tributaries, except as noted.

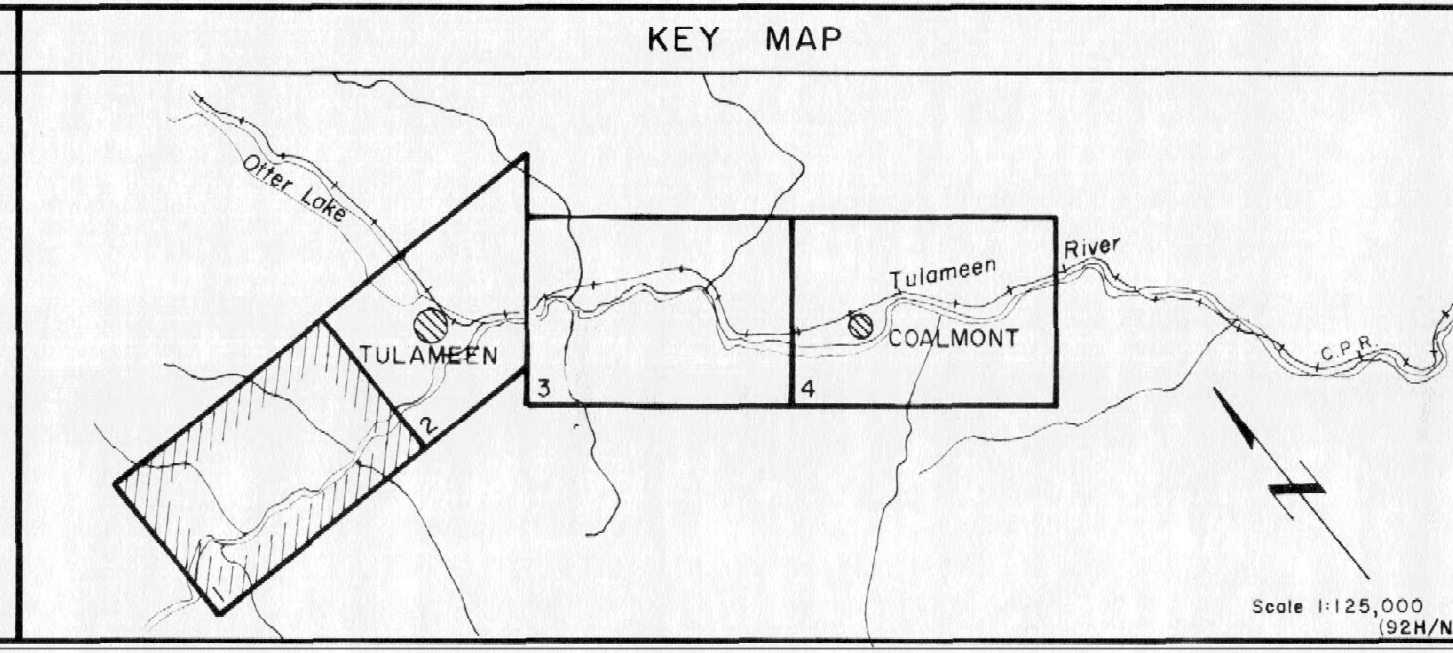

f) Required setback of building from the natural boundaries of lakes and watercourses to allow for the passage of flood waters and possible bank erosion are not shown. This information is available either through local municipalities or the Ministry of Environment.

LEGEND

200 Year Floodplain Limit

Flood levels in metres above G.S.C. Datum

785.0 200 Year Frequency 20 Year Flood Level (freeboard included)
