

# Welcome to the District of Okanagan-Similkameen

## Public Information Meeting

The RDOS is nearing the completion of the combined Stage 1 & 2 of the amendment to its current Liquid Waste Management Plan (LWMP). A LWMP for a municipality charts the future course of action for the management of wastewater; including sewage collection, sewage treatment and return of treated effluent to the receiving environment. Developing a LWMP is a three stage process that involves:

Stage 1 – Identify local wastewater management issues and options

Stage 2 – Develop and analyze option details, rank and select the preferred solutions

Stage 3 – Prepare the executive report, finalize LWMP and submit to the Minister of Environment

As part of the combined Stage 1 & 2 process, we would like to present the Advisory Committee's preferred solutions for the management of wastewater in your community. The Advisory Committee, the District and the consultant (AECOM) would like to solicit feedback from the public to confirm that you support the Advisory Committee's recommendations.

Feel free to view the displays and ask questions to any of the members or staff in attendance. Presentations will be made by AECOM at 5:00 pm, 6:00 pm and 7:00 pm.

An exit survey is provided for your comments and feedback.
