

2016 to 2017 Naramata Water Meter Pilot Program:

The Naramata Water Meter Pilot Program was completed in 2017. The meters are still a great tool for Naramata enabling everyone who had a meter installed to see how much water they use. A total of 115 water meters were installed (36 commercial/winery, 44 agricultural and 35 residential).

As new connections are installed or existing connections are replaced, meter vaults are installed for receiving a meter in the future.
